

## **Foocus Bottle ®: Your focus, your reality!**

### **Purpose**

By using this bottle, people will notice

- That it is easy to change ones mindset.
- That they will feel better mentally and physically.
- They will take responsibility for their life.

### **The Bottle**

Water with a message!

We all have a different background and perceive the world differently. Many diseases come from the way we think about life, ourselves and others. By using this bottle we can select the changes we need.

F.E: If we want more confidence we can turn the word "Confidence" in the frame and we are able to drink the water with the intention of Confidence. Through repetition it will get rooted in our system. In total we can choose 15 words: Love, Inner-Peace, Happiness, Freedom, Humor, Confidence, Self-Esteem, Health, Wealth, Success, Luck, Courage, Belief, Faith, Safety!

## **Theory**

The function of this BPA-free transparent bottle with bamboo ring and - lid is based on the theory of the Japanese scientist J Dr. Masaru Emoto and the physician Bruce Lipton.

When we link a positive intention to the water we drink from this bottle, the cells in our body will copy themselves positively and we will feel better mentally and physically.

Water is the main component of our human body, for 70% we are built out of water **Dr. M. Emoto wrote some influential books like:** '*The message of water, Water has the answer, The secret life of water, The miracle of water and (for children) Water has a secret*'. By exposing water to the words hate and love, Hitler and Mother Teresa, classical music and heavy metal and freeze it subsequently, he discovered that the crystals which appeared after freezing the water, were beautifully shaped after being exposed to the words, Mother Teresa, or the sound of classical music. The other crystals were ugly and distorted beside the words: hate, Hitler or the sound of heavy metal. It is important to focus on positive words and music when we like to have a better vibration physically and mentally

By using this bottle we can reach this water vibration and we are able to create massive changes personally and globally.

Bruce Lipton (writer of the book: 'The Biology of belief') did stem cells research as a medical scientist ) According to his research the things we believe in will create our reality. Our programming is based in our subconscious mind, we live from this part of our mind 95% each day. When our programming will keep us small, we will achieve little in life. When we start feeding ourselves with new, healthy and freedom giving beliefs, our life will drastically improve.

## **Extra**

By adding a rhinestone to the water ( frequently water is exposed to heavy metals and chemicals) at the bottom of this bottle, the quality of the water will improve and be vitalized. The space at the bottom can be used for herbs, fruits and tea leaves too.

You can choose for a transparent bottle with a bamboo ring and - lid for €19,95  
Or a colored silicon ring and lid for €15,95 each.

This bottle is the embodiment of positivity. From every sold bottle €1,- will be donated to the widow – and orphan project in the developing countries  
Take a look at our fb page and see what we already accomplished:  
[www.facebook.com/widowandorphancare](http://www.facebook.com/widowandorphancare)

Our focus will be our reality and every moment we have the choice where to focus on.
